Insolvency	None	Immediate default

G.3 Default Remedies - Enforcement Cascade:

Upon Event of Default and expiration of any applicable cure period, Secured Party may exercise the following remedies IN ORDER:

Step 1: PIL Revenue Acceleration
- All escrowed PIL revenue immediately applied to combined loan balance
- Future PIL revenue continues to be captured
- Priority: Loan 1 obligations first, then Loan 2

Step 2: BTC/ETH Collateral Liquidation via Morpho Protocol
- Morpho Protocol automatically liquidates WBTC collateral (Loan 1)
- Morpho Protocol automatically liquidates WETH collateral (Loan 2)
- Liquidation proceeds applied to outstanding loan balances

- Any surplus returned to Borrower
- Liquidation governed by Morpho Blue smart contract at 0xBBBBBbbBBb9cC5e90e3b3Af64bdAF62C37EEFFCb

Step 3: SLAPS IP Transfer (ONLY IF STEPS 1-2 INSUFFICIENT)
- SLAPS IP Portfolio transfers to Secured Party
- Story Protocol ownership transfer executed via IPID 0x98971c660ac20880b60F86Cc3113eBd979eb3aAE
- PIL license revenue permanently redirected
- Only triggered if combined BTC + ETH liquidation and PIL revenue cannot satisfy outstanding balance

Step 4: Deficiency Judgment
- If Steps 1-3 insufficient, Secured Party may pursue deficiency
- Personal guarantee of Clifton Kelly Bell may be enforced

## IMPORTANT NOTES

1. **Loan Escrow Period:** During the first 18 months, 100% of PIL licensing revenue ($33,699/day) is escrowed for $5M loan repayment. All other revenue streams flow directly to the owner.

2. **After Loan Payoff:** PIL revenue unlocks and all streams flow to owner wallet, increasing daily yield from ~$93K to ~$127K.

3. **DeFi Compounding:** Morpho Blue and Centrifuge yields can auto-compound, meaning the effective APY increases over time as reinvested yields generate their own returns.

4. **Portfolio Appreciation:** The $300M present valuation is projected to grow to $1.6B by Year 5. As the portfolio value increases, DeFi yield proportionally increases.

5. **Risk Isolation:** Only SLAPS IP ($75M) is at default risk. The remaining $225M in MR, Whetstone, IP Monitoring, and Infrastructure IP is fully PROTECTED regardless of loan status.

6. **Tax Considerations:** Daily yield is subject to applicable tax obligations. Consult with a qualified tax advisor regarding crypto income reporting requirements.

## IMPORTANT NOTES

1. **Loan Escrow Period:** During the first 18 months, 100% of PIL licensing revenue ($33,699/day) is escrowed for $5M loan repayment. All other revenue streams flow directly to the owner.

2. **After Loan Payoff:** PIL revenue unlocks and all streams flow to owner wallet, increasing daily yield from ~$93K to ~$127K.

3. **DeFi Compounding:** Morpho Blue and Centrifuge yields can auto-compound, meaning the effective APY increases over time as reinvested yields generate their own returns.

4. **Portfolio Appreciation:** The $300M present valuation is projected to grow to $1.6B by Year 5. As the portfolio value increases, DeFi yield proportionally increases.

5. **Risk Isolation:** Only SLAPS IP ($75M) is at default risk. The remaining $225M in MR, Whetstone, IP Monitoring, and Infrastructure IP is fully PROTECTED regardless of loan status.

6. **Tax Considerations:** Daily yield is subject to applicable tax obligations. Consult with a qualified tax advisor regarding crypto income reporting requirements.

- Additional platform revenue, SEP royalties, DeFi yield
- Total projected: $34M-$69M annual yield post-payoff

SECTION 6: DEFAULT CASCADE

6.1 Events of Default

1. Failure to maintain required collateral ratio in Morpho Blue markets
2. Missed PIL revenue allocation for 30 consecutive days
3. Breach of UCC-1 filing terms
4. Unauthorized disposition of SLAPS IP assets
5. Failure to maintain Story Protocol attestation validity

6.2 Default Cascade Stages

```
Stage 1: PIL REVENUE ACCELERATION
â”œâ”€â”€ All PIL licensing revenue immediately accelerated
â”œâ”€â”€ 100% of daily PIL collections applied to outstanding balance
â””â”€â”€ Grace period: 30 days to cure

Stage 2: MORPHO COLLATERAL LIQUIDATION
â”œâ”€â”€ Morpho Blue automatically liquidates BTC/ETH collateral
â”œâ”€â”€ Liquidation initiated when health factor < 1.0
â”œâ”€â”€ Proceeds applied to outstanding loan balance
â└â”€â”€ Morpho liquidation bonus: ~5% incentive to liquidators

Stage 3: SLAPS IP TRANSFER (Only if Stages 1-2 insufficient)
â”œâ”€â”€ Transfer SLAPS IP registration on Story Protocol to secured party
â”œâ”€â”€ Transfer SLAPS PIL licensing rights
â”œâ”€â”€ Update Story Protocol ownership records
â└â”€â”€ CRITICAL: Millionaire Resilience IP remains PROTECTED

Stage 4: DEFICIENCY JUDGMENT
â”œâ”€â”€ If Stages 1-3 do not fully satisfy outstanding balance
â”œâ”€â”€ Standard legal remedies available
â└â”€â”€ Limited to SLAPS entity assets only
```
